Rocky Enterprise Linux 9.2 Manual Pages on command 'polkitd.8'

$ man polkitd.8

POLKITD(8) polkitd POLKITD(8)

NAME

polkitd - PolicyKit daemon

SYNOPSIS

polkitd

DESCRIPTION

polkitd provides the org.freedesktop.PolicyKit1 D-Bus service on the system message bus.

Users or administrators should never need to start this daemon as it will be automatically

started by dbus-daemon(1) whenever an application calls into the service.

AUTHOR

Written by David Zeuthen <davidz@redhat.com> with a lot of help from many others.

BUGS

Please send bug reports to either the distribution or the polkit-devel mailing list, see

the link http://lists.freedesktop.org/mailman/listinfo/polkit-devel on how to subscribe.
