***\$ man XtToolkitThreadInitialize.3***

XtToolkitThreadInitialize(3)      XT FUNCTIONS      XtToolkitThreadInitialize(3)

#### NAME

XtToolkitThreadInitialize - initialize the toolkit for multiple threads

#### SYNTAX

```
#include <X11/Intrinsic.h>
```

```
Boolean XtToolkitThreadInitialize(void);
```

#### DESCRIPTION

If XtToolkitThreadInitialize was previously called, it returns. The application programmer must ensure that two or more threads do not simultaneously attempt to call XtToolkitThreadInitialize; the effect of this is undefined. XtToolkitThreadInitialize returns True if the host operating system has threads and the Intrinsics are thread safe.
