Rocky Enterprise Linux 9.2 Manual Pages on command 'addgnupghome.8'

$ man addgnupghome.8

ADDGNUPGHOME(8)   GNU Privacy Guard 2.2   ADDGNUPGHOME(8)

NAME

   addgnupghome - Create .gnupg home directories

SYNOPSIS

   addgnupghome account_1 account_2...account_n

DESCRIPTION

   If GnuPG is installed on a system with existing user accounts, it is sometimes required to

   populate the GnuPG home directory with existing files. Especially a ?trustlist.txt? and a

   keybox with some initial certificates are often desired. This script helps to do this by

   copying all files from ?/etc/skel/.gnupg? to the home directories of the accounts given on

   the command line. It takes care not to overwrite existing GnuPG home directories.

   addgnupghome is invoked by root as:

     addgnupghome account1 account2 ... accountn

GnuPG 2.2.27   2020-12-21   ADDGNUPGHOME(8)
