DESCRIPTION

These functions calculate the principal value of the arc sine of x ; that is the value whose sine is x .

RETURN VALUE

On success, these functions return the principal value of the arc sine of x in radians; the return value is in the range $[-\pi/2, \pi/2]$.

If x is a NaN, a NaN is returned.

If x is $+0$ (-0), $+0$ (-0) is returned.

If x is outside the range $[-1, 1]$, a domain error occurs, and a NaN is returned.

ERRORS

See `math_error(7)` for information on how to determine whether an error has occurred when calling these functions.

The following errors can occur:

Domain error: x is outside the range $[-1, 1]$

`errno` is set to `EDOM`. An invalid floating-point exception (`FE_INVALID`) is raised.
