$ man ati.4

ATI(4)   Kernel Interfaces Manual   ATI(4)

NAME

    ati - ATI video driver

SYNOPSIS

    Section "Device"

     Identifier "devname"

     Driver "ati"

     ...

    EndSection

DESCRIPTION

    ati is an Xorg wrapper driver for ATI video cards. It autodetects whether your hardware

    has a Radeon, Rage 128, or Mach64 or earlier class of chipset, and loads the radeon(4),

    r128(4), or mach64 driver as appropriate.

SUPPORTED HARDWARE

    The ati driver supports Radeon, Rage 128, and Mach64 and earlier chipsets by loading those

    drivers. See those manpages for specific cards supported.

CONFIGURATION DETAILS

    Please refer to xorg.conf(5) for general configuration details, and the specific card

    driver for driver configuration details.

SEE ALSO

    Xorg(1), xorg.conf(5), Xserver(1), X(7), r128(4), radeon(4)

AUTHORS

    See the individual driver pages for authors.
