Rocky Enterprise Linux 9.2 Manual Pages on command 'buildah-manifest.1'

\$ man buildah-manifest.1

buildah-manifest(1) General Commands Manual buildah-manifest(1)

NAME

buildah-manifest - Create and manipulate manifest lists and image indexes.

SYNOPSIS

buildah manifest COMMAND [OPTIONS] [ARG...]

DESCRIPTION

The buildah manifest command provides subcommands which can be used to:

- * Create a working Docker manifest list or OCI image index.
* Add an entry to a manifest list or image index for a specified image.
* Add or update information about an entry in a manifest list or image index.
* Delete a working container or an image.
* Push a manifest list or image index to a registry or other location.
