Linux Ubuntu 22.4.5 Manual Pages on command 'bundle-check2.7.1'

$ man bundle-check2.7.1

BUNDLE-CHECK(1)   BUNDLE-CHECK(1)

NAME

    bundle-check - Verifies if dependencies are satisfied by installed gems

SYNOPSIS

    bundle check [--dry-run] [--gemfile=FILE] [--path=PATH]

DESCRIPTION

    check searches the local machine for each of the gems requested in the Gemfile. If

    all gems are found, Bundler prints a success message and exits with a status of 0.

    If not, the first missing gem is listed and Bundler exits status 1.

OPTIONS

    --dry-run

        Locks the [Gemfile(5)][Gemfile(5)] before running the command.

    --gemfile

        Use the specified gemfile instead of the [Gemfile(5)][Gemfile(5)].

    --path Specify a different path than the system default ($BUNDLE_PATH or

        $GEM_HOME). Bundler will remember this value for future installs on this ma?

        chine.

                    December 2019   BUNDLE-CHECK(1)
