Linux Ubuntu 22.4.5 Manual Pages on command 'bundle-remove2.7.1'

$ man bundle-remove2.7.1

BUNDLE-REMOVE(1)   BUNDLE-REMOVE(1)

NAME

   bundle-remove - Removes gems from the Gemfile

SYNOPSIS

   bundle remove [GEM [GEM ...]] [--install]

DESCRIPTION

   Removes the given gems from the Gemfile while ensuring that the resulting Gemfile

   is still valid. If a gem cannot be removed, a warning is printed. If a gem is al?

   ready absent from the Gemfile, and error is raised.

OPTIONS

   --install

      Runs bundle install after the given gems have been removed from the Gemfile,

      which ensures that both the lockfile and the installed gems on disk are also

      updated to remove the given gem(s).

   Example:

   bundle remove rails

bundle remove rails rack

bundle remove rails rack --install
