Rocky Enterprise Linux 9.2 Manual Pages on command 'byobu-prompt.1'

$ man byobu-prompt.1

byobu-prompt(1)   byobu   byobu-prompt(1)

NAME

   byobu-prompt, byobu-enable-prompt, byobu-disable-prompt - add and remove a nice color

   prompt to your shell configuration

SYNOPSIS

   byobu-prompt

   byobu-enable-prompt

   byobu-disable-prompt

DESCRIPTION

   Byobu provides a special PS1 prompt command, compatible with Bash shells. It will display

   the previous command's exit code, if it's not zero. It will use 3 separate colors for the

   local username, hostname, and the current working directory.

   byobu-enable-prompt will add one line to your ~/.bashrc.

   You can safely remove the line from your ~/.bashrc, which ends in #byobu-prompt.

   byobu-disable-prompt will remove its color configuration from ~/.bashrc.

   byobu-prompt is an interactive wrapper of the previous two tools.

BUGS

   This is currently only compatible with bash(1).
