## Rocky Enterprise Linux 9.2 Manual Pages on command 'byobu-quiet.1'

### $ man byobu-quiet.1

byobu-quiet(1)                    byobu                    byobu-quiet(1)

NAME

    byobu-quiet - Silence all of Byobu's status indicators and eliminate the hardstatus line

USAGE

    byobu-quiet [--undo]

DESCRIPTION

    byobu-quiet  will  disable  ALL  of Byobu's status indicators and eliminate the hardstatus

    line.

    Some administrators, in some environments, at some times may prefer a very minimal,  quiet

    Byobu,  without the potentially distracting status indicators and eye candy.  However, the

    window menu is preserved, as well as all of Byobu's keybindings and helper utilities.   To

    elminate the window list, use byobu-silent(1).
