Rocky Enterprise Linux 9.2 Manual Pages on command 'chardet.1'

$ man chardet.1

CHARDET(1)   User Commands   CHARDET(1)

NAME

    chardet - universal character encoding detector

SYNOPSIS

    chardet [file ...]

DESCRIPTION

    Report heuristically-detected character encoding for each file.

    For every specified file (defaulting to stdin if no files are specified), reads and deter?

    mines the character encoding of the file content. Reports the name and confidence level

    for each file's detected character encoding.
