Rocky Enterprise Linux 9.2 Manual Pages on command 'check-language-support.1'

\$ man check-language-support.1

check-language-support(1) General Commands Manual check-language-support(1)

NAME

check-language-support - returns the list of missing packages in order to provide a complete language environment

SYNOPSIS

check-language-support [options]

OPTIONS

-h, --help

show this help message and exit

-l LANGUAGE, --language=LANGUAGE

target language code - if omitted, check for all languages on the system

-d DATADIR, --datadir=DATADIR

use an alternative data directory instead of the default /usr/share/language-selector

or

-a, --all

check all available languages

--show-installed

show installed packages as well as missing ones
