### ***Rocky Enterprise Linux 9.2 Manual Pages on command 'copysignl.3'***

#### ***\$ man copysignl.3***

COPYSIGN(3)                      Linux Programmer's Manual                      COPYSIGN(3)

#### NAME

copysign, copysignf, copysignl - copy sign of a number

#### SYNOPSIS

```
#include <math.h>
```

```
double copysign(double x, double y);
```

```
float copysignf(float x, float y);
```

```
long double copysignl(long double x, long double y);
```

Link with -lm.

Feature Test Macro Requirements for glibc (see feature\_test\_macros(7)):

copysign(), copysignf(), copysignl():

```
_ISOC99_SOURCE || _POSIX_C_SOURCE >= 200112L
```

```
|| /* Since glibc 2.19: */ _DEFAULT_SOURCE
```

```
|| /* Glibc versions <= 2.19: */ _BSD_SOURCE || _SVID_SOURCE
```

#### DESCRIPTION

These functions return a value whose absolute value matches that of x, but whose sign bit matches that of y.

For example, `copysign(42.0, -1.0)` and `copysign(-42.0, -1.0)` both return -42.0.

#### RETURN VALUE

On success, these functions return a value whose magnitude is taken from x and whose sign is taken from y.

If x is a NaN, a NaN with the sign bit of y is returned.

#### ERRORS

No errors occur.

## ATTRIBUTES

For an explanation of the terms used in this section, see attributes(7).

## CONFORMING TO

C99, POSIX.1-2001, POSIX.1-2008. This function is defined in IEC 559 (and the appendix with recommended functions in IEEE 754/IEEE 854).

## NOTES

On architectures where the floating-point formats are not IEEE 754 compliant, these functions may treat a negative zero as positive.

## SEE ALSO

signbit(3)
