***Rocky Enterprise Linux 9.2 Manual Pages on command 'cpgr.8'***

**\$ man cpgr.8**

CPPW(8)                      System Manager's Manual                      CPPW(8)

**NAME**

cppw, cpgr - copy with locking the given file to the password or group file

**SYNOPSIS**

cppw [-h] [-s] password\_file

cpgr [-h] [-s] group\_file

**DESCRIPTION**

cppw and cpgr will copy, with locking, the given file to /etc/passwd and /etc/group, respectively. With the -s flag, they will copy the shadow versions of those files, /etc/shadow and /etc/gshadow, respectively.

With the -h flag, the commands display a short help message and exit silently.
