Rocky Enterprise Linux 9.2 Manual Pages on command 'cppw.8'

$ man cppw.8

CPPW(8)   System Manager's Manual   CPPW(8)

NAME

   cppw, cpgr - copy with locking the given file to the password or group file

SYNOPSIS

   cppw [-h] [-s] password_file

   cpgr [-h] [-s] group_file

DESCRIPTION

   cppw and cpgr will copy, with locking, the given file to /etc/passwd and /etc/group, re?

   spectively. With the -s flag, they will copy the shadow versions of those files,

   /etc/shadow and /etc/gshadow, respectively.

   With the -h flag, the commands display a short help message and exit silently.
