Rocky Enterprise Linux 9.2 Manual Pages on command 'envsubst.1'

$ man envsubst.1

ENVSUBST(1)   User Commands   ENVSUBST(1)

NAME

   envsubst - substitutes environment variables in shell format strings

SYNOPSIS

   envsubst [OPTION] [SHELL-FORMAT]

DESCRIPTION

   Substitutes the values of environment variables.

 Operation mode:

  -v, --variables

       output the variables occurring in SHELL-FORMAT

 Informative output:

  -h, --help

       display this help and exit

  -V, --version

       output version information and exit

 In normal operation mode, standard input is copied to standard output, with references to

 environment variables of the form $VARIABLE or ${VARIABLE} being replaced with the corre?

 sponding values.   If a SHELL-FORMAT is given, only those environment variables that are

 referenced in SHELL-FORMAT are substituted; otherwise all environment variables references

 occurring in standard input are substituted.

 When --variables is used, standard input is ignored, and the output consists of the envi?

 ronment variables that are referenced in SHELL-FORMAT, one per line.

REPORTING BUGS

Report bugs in the bug tracker at <https://savannah.gnu.org/projects/gettext> or by email

to <bug-gettext@gnu.org>.

SEE ALSO

The full documentation for envsubst is maintained as a Texinfo manual. If the info and

envsubst programs are properly installed at your site, the command

info envsubst

should give you access to the complete manual.
