Rocky Enterprise Linux 9.2 Manual Pages on command 'fc-query.1'

$ man fc-query.1

FC-QUERY(1)   FC-QUERY(1)

NAME

    fc-query - query font files

SYNOPSIS

    fc-query [-Vh]

    [[-b] [--ignore-blanks]] [[-i index] [--index index]] [[-f format

    ] [--format format]] [--version] [--help] font-file...

DESCRIPTION

    fc-query queries font-file(s) using the normal fontconfig rules and prints out font pat?

    tern for each face found. If --index is given, only one face of each file is queried,

    otherwise all faces are queried.

OPTIONS

    This program follows the usual GNU command line syntax, with long options starting with

    two dashes (`-'). A summary of options is included below.

    -b   Ignore blanks to compute languages

    -i   Only query face indexed index of each file.

    -f   Format output according to the format specifier format.

    -V   Show version of the program and exit.

    -h   Show summary of options.

    font-file

        Query font-file for font faces.

RETURN CODES

    fc-query returns error code 0 for successful parsing, or 1 if any errors occured or if at

least one font face could not be opened.
