Rocky Enterprise Linux 9.2 Manual Pages on command 'fc-validate.1'

$ man fc-validate.1

FC-VALIDATE(1)   FC-VALIDATE(1)

NAME

   fc-validate - validate font files

SYNOPSIS

   fc-validate [-Vhv]

   [[-i index] [--index index]] [[-l lang] [--lang lang]] [--verbose]

   [--version] [--help] font-file...

DESCRIPTION

   fc-validate validates font-file(s) if each fonts satisfies the language coverage according

   to the orthography files in fontconfig. If --index is given, only one face of each file

   is validated, otherwise all faces are validated.

OPTIONS

   This program follows the usual GNU command line syntax, with long options starting with

   two dashes (`-'). A summary of options is included below.

   -i   Only query face indexed index of each file.

   -l   Set lang as a language instead of current locale. this is used for -m.

   -v   Show more detailed information.

   -V   Show version of the program and exit.

   -h   Show summary of options.

   font-file

        Query font-file for font faces.

RETURN CODES

   fc-validate returns error code 0 for successful parsing, or 1 if any errors occured or if

at least one font face could not be opened.
