Rocky Enterprise Linux 9.2 Manual Pages on command 'file-roller.1'

$ man file-roller.1

file-roller(1)   General Commands Manual   file-roller(1)

NAME

   file-roller - archive manager for GNOME

SYNOPSIS

   file-roller [OPTIONS...] [FILE...]

DESCRIPTION

   File Roller is a graphical interface to archiving utilities such as tar and zip.

   It supports most common operations such as creating, modifing and extracting files from an

   archive. You can also view the contents of an archive and open files contained in the ar?

   chive.

OPTIONS

   -a, --add-to=ARCHIVE

      Add files to the specified archive and quit the program

   -d, --add FILE

      Add files asking the name of the archive and quit the program

   -e, --extract-to=FOLDER

      Extract archives to the specified folder and quit the program

   -f, --extract

      Extract archives asking the destination folder and quit the program

   -h, --extract-here

      Extract archives using the archive name as destination folder and quit the program

   --default-dir=FOLDER

      Default folder to use for the '--add' and '--extract' commands

--force

      Create destination folder without asking confirmation

This program also accepts the standard GNOME and GTK options.

AUTHORS

file-roller is written by Paolo Bacchilega <paolo.bacch@tin.it>.

This manual page was written by Sven Arvidsson <sa@whiz.se>, for the Debian project (but

may be used by others).
