\$ man gnome-language-selector.1

gnome-language-selector(1) General Commands Manual gnome-language-selector(1)

NAME

gnome-language-selector - graphical language selection utility

SYNOPSIS

gnome-language-selector [OPTIONS]

DESCRIPTION

gnome-language-selector is a graphical utility that allows a user to set a default language for the system interface and to add additional language packs, spelling tools and additional fonts.

OPTIONS

-h, --help

show this help message and exit

-n, --no-verify-installed-lang-support

do not verify installed language support

-d DATADIR, --datadir=DATADIR

use an alternative data directory instead of the default /usr/share/language-selector
