Rocky Enterprise Linux 9.2 Manual Pages on command 'go-mod.1'

$ man go-mod.1

GO(1)   General Commands Manual   GO(1)

NAME

   go-mod - module maintenance

SYNOPSIS

   go mod command [arguments]

DESCRIPTION

   Go mod provides access to operations on modules.

   Note that support for modules is built into all the go commands, not just 'go mod'. For

   example, day-to-day adding, removing, upgrading, and downgrading of dependencies should be

   done using 'go get'. See 'go help modules' for an overview of module functionality.

COMMANDS

   download

       download modules to local cache

   edit   edit go.mod from tools or scripts

   graph print module requirement graph

   init   initialize new module in current directory

   tidy   add missing and remove unused modules

   vendor make vendored copy of dependencies

   verify verify dependencies have expected content

   why   explain why packages or modules are needed

   Use "go help mod <command>" for more information about a command.

AUTHOR

   This manual page and is maintained by the Debian Go Compiler Team <team+go-com?

piler@tracker.debian.org> based on the output of 'go help mod' for the Debian project (and may be used by others).
