Rocky Enterprise Linux 9.2 Manual Pages on command 'go-tool.1'

\$ man go-tool.1

GO-TOOL(1) General Commands Manual GO-TOOL(1)

NAME

go-tool - tool for managing Go source code

SYNOPSIS

go tool [-n] command [args...]

DESCRIPTION

Tool runs the go tool command identified by the arguments. With no arguments it prints the list of known tools.

OPTIONS

-n The -n flag causes tool to print the command that would be executed but not execute it.

For more about each tool command, see 'go tool command -h'.

AUTHOR

This manual page was written by Michael Stapelberg <stapelberg@debian.org> and is maintained by the Debian Go Compiler Team <team+go-compiler@tracker.debian.org> based on the output of 'go help tool' for the Debian project (and may be used by others).
