Rocky Enterprise Linux 9.2 Manual Pages on command 'gpgsplit.1'

\$ man gpgsplit.1

gpgsplit(1) General Commands Manual gpgsplit(1)

NAME

gpgsplit - Split an OpenPGP message into packets

SYNOPSIS

gpgsplit [OPTIONS] [FILES]

DESCRIPTION

This manual page documents briefly the gpgsplit command.

gpgsplit splits an OpenPGP message into packets.

OPTIONS

-v,--verbose

Verbose.

-p,--prefix STRING

Prepend filenames with STRING.

--uncompress

Uncompress a packet.

--secret-to-public

Convert secret keys to public keys.

--no-split

Write to stdout and don't actually split.
