IBUS(1)   User Commands   IBUS(1)

NAME

    ibus - command line utility for ibus

SYNOPSIS

    ibus COMMAND [OPTION]...

DESCRIPTION

    IBus is an Intelligent Input Bus. It is a new input framework for Linux OS. It provides

    full featured and user friendly input method user interface. It also may help developers

    to develop input method easily.

    ibus is a command line utility which can restart or exit ibus-daemon, get or set the cur?

    rent ibus engine or list the ibus engines.

    Homepage: https://github.com/ibus/ibus/wiki

COMMAND

    help   Show the commands list.

    engine [ENGINE_NAME]

        Show the curent ibus engine when ENGINE_NAME is not given. Set ENGINE_NAME to the

        current ibus engine.

    exit   Exit ibus-daemon.

    list-engine

        Show ibus engines list.

    restart

        Restart ibus-daemon.

    version

Show the ibus version.

read-cache [--system|--file=FILE]

Show the content of the user registry cache if --system is not given. Show the content of the system registry cache if --system is given. Show the content of the custom registry cache FILE if --file=FILE is given.

write-cache [--system|--file=FILE]

Save the user registry cache if --system is not given. Save the system registry cache if --system is given. Save the custom registry cache FILE if --file=FILE is given.

By default, it reads the component XML files from the standard component directory (/usr/share/ibus/component), you can set IBUS_COMPONENT_PATH environment variable for custom component directories, separated by ':'.

address

Show the D-Bus address of ibus-daemon.

read-config

Print the setting values in a gsettings configuration file.

reset-config

Reset the user setting values to the default ones in a gsettings configuration file.

watch Under construction.

emoji [--font=FONT|--lang=LANG|--help|--partial-match]

Launch IBus Emojier (ibus-emoji (1)) and save the selected emoji to your clip‐ board. Can choose an emoji font with --font option. Can choose a language of emoji annotations with --lang option. If LANG="en", IBus Emojier loads /usr/share/ibus/dicts/emoji-en.dict . --partial-match option enables to match an‐ notations with a partial string. These settings are available with ibus-setup (1) utility.

BUGS

If you find a bug, please report it at https://github.com/ibus/ibus/issues
