Rocky Enterprise Linux 9.2 Manual Pages on command 'info.5'

$ man info.5

INFO(5)   File Formats Manual   INFO(5)

NAME

   info - readable online documentation

DESCRIPTION

   The Info file format is an easily-parsable representation for online documents. It can be

   read by emacs(1) and info(1) among other programs.

   Info files are usually created from texinfo(5) sources by makeinfo(1), but can be created

   from scratch if so desired.

   For a full description of the Texinfo language and associated tools, please see the Tex?

   info manual (written in Texinfo itself). Most likely, running this command from your

   shell:

   info texinfo

   or this key sequence from inside Emacs:

   M-x info RET m texinfo RET

   will get you there.

AVAILABILITY

   http://www.gnu.org/software/texinfo/

REPORTING BUGS

   Please send bug reports to bug-texinfo@gnu.org, general questions and discussion to help-

   texinfo@gnu.org.
