$ man install-info.1

INSTALL-INFO(1)   User Commands   INSTALL-INFO(1)

NAME

    install-info - update info/dir entries

SYNOPSIS

    install-info [OPTION]... [INFO-FILE [DIR-FILE]]

DESCRIPTION

    Add or remove entries in INFO-FILE from the Info directory DIR-FILE. INFO-FILE and

    DIR-FILE are required unless the --info-file or --dir-file (or --info-dir) options are

    given, respectively.

OPTIONS

    --add-once

        add only to first matching section, not all.

    --align=COL

        start description of new entries at column COL.

    --calign=COL

        format second and subsequent description lines to start at column COL.

    --debug

        report what is being done.

    --delete

        delete existing entries for INFO-FILE from DIR-FILE; don't insert any new entries.

    --defsection=TEXT

        like --section, but only use TEXT if no sections are present in INFO-FILE (replac?

        ing "Miscellaneous").

--description=TEXT

    the description of the entry is TEXT; used with the --name option to become synony?

    mous with the --entry option.

--dir-file=NAME

    specify file name of Info directory file; equivalent to using the DIR-FILE argu?

    ment.

--dry-run

    same as --test.

--entry=TEXT

    insert TEXT as an Info directory entry, overriding any corresponding entry from

    DIR-FILE. TEXT is written as an Info menu item line followed

by zero or more extra lines starting with whitespace.

    If you specify more than one entry, all are added. If you don't specify any en?

    tries, they are determined

    from information in the Info file itself.

--help display this help and exit.

--info-dir=DIR

    same as --dir-file=DIR/dir.

--info-file=FILE

    specify Info file to install in the directory; equivalent to using the INFO-FILE

    argument.

--item=TEXT

    same as --entry=TEXT.

--keep-old

    do not replace entries, or remove empty sections.

--maxwidth, --max-width=COL

    wrap description at column COL.

--menuentry=TEXT

    same as --name=TEXT.

--name=TEXT

    the name of the entry is TEXT; used with --description to become synonymous with

    the --entry option.

--no-indent

do not format new entries in the DIR file.

--quiet

suppress warnings.

--regex=R

put this file's entries in all sections that match the regular expression R (ignor?

ing case).

--remove

same as --delete.

--remove-exactly

only remove if the info file name matches exactly; suffixes such as .info and .gz

are not ignored.

--section=SEC

put entries in section SEC of the directory. If you specify more than one section,

all the entries

are added in each of the sections.

If you don't specify any sections, they are determined

from information in the Info file itself;

if nothing is available there, the --defsection value is used; if that is not spec?

ified, the final default is "Miscellaneous".

--section R SEC

equivalent to --regex=R --section=SEC --add-once.

--silent

suppress warnings.

--test suppress updating of DIR-FILE.

--version

display version information and exit.

REPORTING BUGS

Email bug reports to bug-texinfo@gnu.org, general questions and discussion to help-tex?

info@gnu.org.
