Rocky Enterprise Linux 9.2 Manual Pages on command 'msexpand.1'

\$ man msexpand.1

MSEXPAND(1) General Commands Manual MSEXPAND(1)

NAME

msexpand - decompress data compressed using mscompress(1) or COMPRESS.EXE

SYNOPSIS

msexpand [-h]
msexpand [-V]
msexpand [name ...]

DESCRIPTION

Msexpand decompress files compressed using mscompress(1) or Microsoft COMPRESS.EXE utility (e.g. Windows 3.x installation files). If no files are specified, the standard input is decompressed to the standard output.
