Rocky Enterprise Linux 9.2 Manual Pages on command 'npm-completion.1'

\$ man npm-completion.1

NPM-COMPLETION(1)

NPM-COMPLETION(1)

NAME

npm-completion - Tab Completion for npm

Synopsis

source <(npm completion)

Note: This command is unaware of workspaces.

Description

Enables tab-completion in all npm commands.

The synopsis above loads the completions into your current shell. Adding it to your

~/.bashrc or ~/.zshrc will make the completions available everywhere:

npm completion >> ~/.bashrc

npm completion >> ~/.zshrc

You may of course also pipe the output of npm completion to a file such as /usr/lo?

cal/etc/bash_completion.d/npm or /etc/bash_completion.d/npm if you have a system that will

read that file for you.

When COMP_CWORD, COMP_LINE, and COMP_POINT are defined in the environment, npm completion

acts in "plumbing mode", and outputs completions based on the arguments.
