Rocky Enterprise Linux 9.2 Manual Pages on command 'pw-mididump.1'

\$ man pw-mididump.1

PW-MIDIDUMP(1) General Commands Manual PW-MIDIDUMP(1)

NAME

pw-mididump - The PipeWire MIDI dump

SYNOPSIS

pw-mididump [options] [FILE]

DESCRIPTION

Dump MIDI messages to stdout.

When a MIDI file is given, the events inside the file are printed.

When no file is given, pw-mididump creates a PipeWire MIDI input stream and will print all

MIDI events received on the port to stdout.

OPTIONS

-r | --remote=NAME

The name the remote instance to monitor. If left unspecified, a connection is made to the default PipeWire instance.

-h | --help

Show help.

--version

Show version information.

AUTHORS

The PipeWire Developers <<https://gitlab.freedesktop.org/pipewire/pipewire/issues>>;

PipeWire is available from <https://pipewire.org>
