$ man python-dotenv.1

PYTHON-DOTENV(1)   User Commands   PYTHON-DOTENV(1)

NAME

    python-dotenv - .env file manipulator

SYNOPSIS

    python-dotenv [OPTIONS] COMMAND [ARGS]...

DESCRIPTION

        This script is used to set, get or unset values from a .env file.

OPTIONS

    -f, --file PATH

        Location of the .env file, defaults to .env file in current working directory.

    -q, --quote [always|never|auto]

        Whether to quote or not the variable values. Default mode is always. This does not

        affect parsing.

    -e, --export BOOLEAN

        Whether to write the dot file as an executable bash script.

    --version

        Show the version and exit.

    --help Show this message and exit.

  Commands:

    get   Retrieve the value for the given key.

    list   Display all the stored key/value.

    run   Run command with environment variables present.

    set   Store the given key/value.

unset   Removes the given key.
