Linux Ubuntu 22.4.5 Manual Pages on command 'rdfdump.1'

$ man rdfdump.1

RDFDUMP(1)   Debian Manual   RDFDUMP(1)

NAME

　　rdfdump - dumps an RDOFF object in human-readable form

SYNOPSIS

　　rdfdump [-v] <filename>

DESCRIPTION

　　rdfdump prints a list of the header records in an RDOFF object in human-readable

　　form, and optionally prints a hex dump of the contents of the segments.

　　rdfdump supports both version 1 and 2 of RDOFF. It will give warnings if the RD?

　　OFF2 format is violated (it looks for incorrect lengths for header records, and

　　checks the overall length count at the start of the file).

OPTIONS

　　-v   Print a hex dump of the contents of the segments.
