Linux Ubuntu 22.4.5 Manual Pages on command 'runc-delete.8'

$ man runc-delete.8

runc-delete (8"")   runc-delete (8"")

NAME

    runc-delete - delete any resources held by the container

SYNOPSIS

    runc delete [--force|-f] container-id

OPTIONS

    --force|-f : Forcibly delete the running container, using SIGKILL signal(7) to stop

    it first.

EXAMPLES

    If the container id is ubuntu01 and runc list currently shows its status as

    stopped, the following will delete resources held for ubuntu01, removing it from

    the runc list:

        # runc delete ubuntu01

SEE ALSO

    runc-kill(8), runc(8).
