## Rocky Enterprise Linux 9.2 Manual Pages on command 'scsi_temperature.8'

### $ man scsi_temperature.8

| SCSI_TEMPERATURE(8) | SG3_UTILS | SCSI_TEMPERATURE(8) |
|---|---|---|

NAME

    scsi_temperature - fetch the temperature of a SCSI device

SYNOPSIS

    scsi_temperature [--help] [--verbose] DEVICE [DEVICE]*

DESCRIPTION

    This bash shell script calls the sg_logs utility on each given DEVICE in order to find the

    device's temperature. The Temperature log page is checked first and if it is not available

    then the Informational Exceptions log page is checked.

OPTIONS

    Arguments to long options are mandatory for short options as well.

    -h, --help

        print out the usage message then exit.

    -v, --verbose

        increase level or verbosity.

EXIT STATUS

    The  exit  status  of this script is 0 when it is successful. Otherwise the exit status is

    that of the last sg_logs utility called. See the sg3_utils(8) man page.
