Rocky Enterprise Linux 9.2 Manual Pages on command 'seahorse.1'

$ man seahorse.1

SEAHORSE(1)   User Commands   SEAHORSE(1)

NAME

    seahorse - Passwords and Keys

SYNOPSIS

    seahorse [OPTIONS...] [FILES...]

DESCRIPTION

    Seahorse is a graphical interface for managing and using encryption keys, passwords and

    certificates. Currently it supports PGP keys (using GPG/GPGME) and SSH keys. Its goal is

    to provide an easy to use Key Management Tool, along with an easy to use interface for

    encryption operations.

OPTIONS

    -?, --help

        Prints a short help text and exits.

    --help-all

        Show all help options

    --help-gtk

        Show all GTK options

APPLICATION OPTIONS

    -v, --version

        Version of this application

    --display=DISPLAY

        X display to use

BUGS

If you find a bug, please report it at https://gitlab.gnome.org/GNOME/seahorse/issues/new.
