**\$ man sotruus.1**

SOTRUSS(1) User Commands SOTRUSS(1)

#### NAME

sotruus - trace shared library calls through PLT

#### SYNOPSIS

sotruus [OPTION...] [--] EXECUTABLE [EXECUTABLE-OPTION...]

#### DESCRIPTION

sotruus is a small wrapper around ld.so that runs the specified executable until it exits.

It intercepts and produce a trace of the dynamic library calls which are called by the ex?

ecuted process via the Procedure Linkage Table (PLT). It outputs the caller, the calle and

the parameters as each call is executed.

#### OPTIONS

-F, --from FROMLIST

Trace calls from objects on FROMLIST.

-T, --to TOLIST

Trace calls to objects on TOLIST.

-e, --exit

Also show exits from the function calls.

-f, --follow

Trace child processes as they are created by currently traced processes as a result of the fork(2) system call.

-o, --output FILENAME

Write output to FILENAME (or FILENAME. in case -f is also used) instead of standard error.

-, --help

Give this help list

--usage

Give a short usage message

--version

Print program version
