NAME

   spice-vdagent - Spice guest agent X11 session agent

SYNOPSIS

   spice-vdagent [OPTIONS]

DESCRIPTION

   The spice guest agent for Linux consists of 2 parts, a system wide daemon spice-vdagentd

   and a X11 session agent spice-vdagent of which there is one per X11 session.

   spice-vdagent gets automatically started in desktop environments which honor /etc/xdg/au?

   tostart, and under gdm.

FEATURES

   The spice guest agent adds the following features to spice Linux guests:

   Client mouse mode (no need to grab mouse by client, no mouse lag)

   Automatic adjustment of the X11 session's number of virtual monitors, and their resolu?

   tion, to the number of client windows and their resolution

   Support of copy and paste (text and images) between the active X11 session and the client,

   this supports both the primary selection and the clipboard

   Support for transferring files from the client to the agent

OPTIONS

   -h   Print a short description of all command line options

   -d   Log debug messages

   -s port

      Set virtio serial port (default: /dev/virtio-ports/com.redhat.spice.0)

-x   Don't daemonize

-f dir|xdg-desktop|xdg-download

Set directory where to save files send from the client, this can be either an arbi?

trary dir or one of the special values of xdg-desktop or xdg-download to select the

default xdg Desktop resp. xdg Download directory. If no value is specified the de?

fault is xdg-desktop when running under a Desktop Environment which has icons on

the desktop and xdg-download under other Desktop Environments

-o 0|1 Disable/enable opening the file save directory with xdg-open (showing the directory

in the file manager) when a file transfer from the client completes. If no value is

specified the default is 0 when running under a Desktop Environment which has icons

on the desktop and 1 under other Desktop Environments
