SYSTEMD-BINFMT.SERVICE(8)      systemd-binfmt.service      SYSTEMD-BINFMT.SERVICE(8)

**NAME**

systemd-binfmt.service, systemd-binfmt - Configure additional binary formats for executables at boot

**SYNOPSIS**

systemd-binfmt.service

/lib/systemd/systemd-binfmt

**DESCRIPTION**

systemd-binfmt.service is an early boot service that registers additional binary formats for executables in the kernel.

See binfmt.d(5) for information about the configuration of this service.

**OPTIONS**

--unregister

If passed, instead of registering configured binary formats in the kernel, the reverse operation is executed: all currently registered binary formats are unregistered from the kernel.

`--cat-config`

Copy the contents of config files to standard output. Before each file, the filename is printed as a comment.

`--no-pager`

Do not pipe output into a pager.

`-h, --help`

Print a short help text and exit.

`--version`

Print a short version string and exit.
