\$ man update-shells.8

UPDATE-SHELLS(8) System Manager's Manual UPDATE-SHELLS(8)

NAME

update-shells - update the list of valid login shells

SYNOPSIS

update-shells [options]

DESCRIPTION

update-shells locates the shells provided by packages from /usr/share/debianutils/shells.d and updates /etc/shells with newly added or removed shells. To track changes made by the administrator, it consults a state file in /var/lib/shells.state .

OPTIONS

--no-act

Do not actually perform the changes to /etc/shells .

--root ROOT

Operate on a chroot at ROOT .

--verbose

Print the shells that are being added or removed.

FILES

`/etc/shells` `/var/lib/shells.state` `/usr/share/debianutils/shells.d`
