Linux Ubuntu 22.4.5 Manual Pages on command 'virt-sanlock-cleanup.8'

$ man virt-sanlock-cleanup.8

VIRT-SANLOCK-CLEANUP(1)   Virtualization Support   VIRT-SANLOCK-CLEANUP(1)

NAME

    virt-sanlock-cleanup - remove stale sanlock resource lease files

SYNOPSIS

    virt-sanlock-cleanup

DESCRIPTION

    This tool removes any resource lease files created by the sanlock lock manager

    plugin. The resource lease files only need to exist on disks when a guest using the

    resource is active. This script reclaims the disk space used by resources which are

    not currently active.

EXIT STATUS

    Upon successful processing of leases cleanup, an exit status of 0 will be set. Upon

    fatal error a non-zero status will be set.

AUTHOR

    Daniel P. Berrang?

BUGS

    Please report all bugs you discover. This should be done via either:

    1. the mailing list

       https://libvirt.org/contact.html

    2. the bug tracker

       https://libvirt.org/bugs.html

    Alternatively, you may report bugs to your software distributor / vendor.
