XDG-SCREENSAVER(1)   xdg-screensaver Manual   XDG-SCREENSAVER(1)

NAME

    xdg-screensaver - command line tool for controlling the screensaver

SYNOPSIS

    xdg-screensaver suspend WindowID

    xdg-screensaver resume WindowID

    xdg-screensaver {activate | lock | reset | status}

    xdg-screensaver {--help | --manual | --version}

DESCRIPTION

    xdg-screensaver provides commands to control the screensaver.

    xdg-screensaver is for use inside a desktop session only. It is not recommended to use

    xdg-screensaver as root.

COMMANDS

    suspend WindowID

        Suspends the screensaver and monitor power management. WindowID must be the X Window

        ID of an existing window of the calling application. The window must remain in

        existence for the duration of the suspension.

        WindowID can be represented as either a decimal number or as a hexadecimal number

        consisting of the prefix 0x followed by one or more hexadecimal digits.

        The screensaver can be suspended in relation to multiple windows at the same time. In

        that case screensaver operation is only restored once the screensaver has been resumed

        in relation to each of the windows

    resume WindowID

Resume the screensaver and monitor power management after being suspended. WindowID

must be the same X Window ID that was passed to a previous call of xdg-screensaver

suspend

activate

Turns the screensaver on immediately. This may result in the screen getting locked,

depending on existing system policies.

lock

Lock the screen immediately.

reset

Turns the screensaver off immediately. If the screen was locked the user may be asked

to authenticate first.

status

Prints enabled to stdout if the screensaver is enabled to turn on after a period of

inactivity and prints disabled if the screensaver is not enabled.

OPTIONS

--help

Show command synopsis.

--manual

Show this manual page.

--version

Show the xdg-utils version information.

EXIT CODES

An exit code of 0 indicates success while a non-zero exit code indicates failure. The

following failure codes can be returned:

1

Error in command line syntax.

3

A required tool could not be found.

4

The action failed.

EXAMPLES

xdg-screensaver suspend 0x1c00007

Causes the screensaver to be disabled till xdg-screensaver resume 0x1c00007 is called.

0x1c00007 must be the X Window ID of an existing window.
