Rocky Enterprise Linux 9.2 Manual Pages on command 'zforce.1'

$ man zforce.1

ZFORCE(1)   General Commands Manual   ZFORCE(1)

NAME

  zforce - force a '.gz' extension on all gzip files

SYNOPSIS

  zforce [name ...]

DESCRIPTION

  zforce forces a .gz extension on all gzip files so that gzip will not compress them twice.

  This can be useful for files with names truncated after a file transfer. On systems with

  a 14 char limitation on file names, the original name is truncated to make room for the

  .gz suffix. For example, 12345678901234 is renamed to 12345678901.gz. A file name such as

  foo.tgz is left intact.
