**PowerShell Get-Help on command 'Add-ProvisioningPackage'**

**PS C:\Users\wahid> Get-Help Add-ProvisioningPackage**

#### NAME

Install-ProvisioningPackage

#### SYNOPSIS

Install .PPKG package onto the local machine.

#### SYNTAX

```
Install-ProvisioningPackage [-PackagePath] <String> [-ConnectedDevice]
[-ForceInstall] [-LogsDirectoryPath <String>] [-QuietInstall] [-WprpFile
<String>] [<CommonParameters>]
```

#### DESCRIPTION

This cmdlet is used to install .ppkg files that are generated and exported by the Windows Configuration Designer tool (/windows/configuration/provisioning-packages/provisioning-install-icd).

The Install-ProvisioningPackage cmdlet is supported on Windows 11 client operating system only.

You can use this cmdlet to install a .ppkg file interactively or silently by specifying the -QuietInstall switch parameter.

The default is an interactive install.

## PARAMETERS

-ConnectedDevice [<SwitchParameter>]

Install package to removable media.

-ForceInstall [<SwitchParameter>]

Force the installation of the package.

-LogsDirectoryPath <String>

Specifies the logs directory path.

-PackagePath <String>

Path to provisioning package

-QuietInstall [<SwitchParameter>]

Quietly installs the package without any customer interaction.

-WprpFile <String>

Specifies the name of a WPR profile file.

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about\_CommonParameters (<https://go.microsoft.com/fwlink/?LinkId=113216>).

----- Example 1 -----

```
PS C:\> Install-ProvisioningPackage -PackagePath C:\mypackage.ppkg
```

```
-QuietInstall
```

This will install the mypackage.ppkg file silently without customer interaction.
