PowerShell Get-Help on command 'Clear-BitLockerAutoUnlock'

PS C:\Users\wahid> Get-Help Clear-BitLockerAutoUnlock

NAME

Clear-BitLockerAutoUnlock

SYNOPSIS

Removes BitLocker automatic unlocking keys.

SYNTAX

Clear-BitLockerAutoUnlock [<CommonParameters>]

DESCRIPTION

The Clear-BitLockerAutoUnlock cmdlet removes all automatic unlocking keys used by BitLocker Drive Encryption. BitLocker stores these keys for the fixed data drives of a system on a volume that hosts a BitLocker-enabled operating system volume so that it can automatically unlock the fixed and removable data volumes in a system. This makes it easier for users to access data volumes.

You can configure BitLocker to automatically unlock volumes that do not host an operating system. After a user unlocks the operating system volume, BitLocker uses encrypted information stored in the registry and volume

metadata to unlock any data volumes that use automatic unlocking.

You must remove automatic unlocking keys before you can disable BitLocker by using the `Disable-BitLocker` cmdlet. You can use the `Disable-BitLockerAutoUnlock` cmdlet to remove keys for specific volumes that use automatic unlocking instead of all volumes.

For an overview of BitLocker, see [BitLocker Drive Encryption Overview](https://technet.microsoft.com/en-us/library/cc732774.aspx) (https://technet.microsoft.com/en-us/library/cc732774.aspx) on TechNet.

PARAMETERS

<CommonParameters>

This cmdlet supports the common parameters: `Verbose`, `Debug`, `ErrorAction`, `ErrorVariable`, `WarningAction`, `WarningVariable`, `OutBuffer`, `PipelineVariable`, and `OutVariable`. For more information, see [about_CommonParameters](https://go.microsoft.com/fwlink/?LinkID=113216) (https://go.microsoft.com/fwlink/?LinkID=113216).

----- Example 1: Clear automatic unlocking keys -----

```
PS C:\>Clear-BitLockerAutoUnlock
```

This command clears all automatic unlocking keys stored on the current computer.
