PowerShell Get-Help on command 'Disable-BitLockerAutoUnlock'

PS C:\Users\wahid> Get-Help Disable-BitLockerAutoUnlock

NAME

    Disable-BitLockerAutoUnlock

SYNOPSIS

    Disables automatic unlocking for a BitLocker volume.

SYNTAX

    Disable-BitLockerAutoUnlock [-MountPoint] <String[]> [-Confirm] [-WhatIf]

    [<CommonParameters>]

DESCRIPTION

    The Disable-BitLockerAutoUnlock cmdlet disables automatic unlocking for a

    volume protected by BitLocker Disk Encryption. The cmdlet removes automatic

    unlocking keys for specified volumes stored on a volume that hosts an

    operating system.

    You can configure BitLocker to automatically unlock volumes that do not host

    an operating system. After a user unlocks the operating system volume,

    BitLocker uses encrypted information stored in the registry and volume

metadata to access data volumes that use automatic unlocking.

You can specify a volume by drive letter, or you can specify a BitLocker volume object. You must remove automatic unlocking keys before you can disable BitLocker by using the Disable-BitLocker cmdlet. You can use the Clear-BitLockerAutoUnlock cmdlet to remove keys for all the volumes configured to use automatic unlocking instead of just specified volumes.

For an overview of BitLocker, see BitLocker Drive Encryption Overview (https://technet.microsoft.com/en-us/library/cc732774.aspx)on TechNet.

PARAMETERS

  -Confirm [<SwitchParameter>]

    Prompts you for confirmation before running the cmdlet.

  -MountPoint <String[]>

    Specifies an array of drive letters or BitLocker volume objects. The cmdlet disables automatic unlocking for the volumes specified. To obtain a BitLocker volume object, use the Get-BitLockerVolume cmdlet.

  -WhatIf [<SwitchParameter>]

    Shows what would happen if the cmdlet runs. The cmdlet is not run.

  <CommonParameters>

    This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (https:/go.microsoft.com/fwlink/?LinkID=113216).

----- Example 1: Disable automatic unlocking for a volume -----

PS C:\> Disable-BitLockerAutoUnlock -MountPoint "E:"

This command disables automatic unlocking for the specified BitLocker volume.
