### ***PowerShell Get-Help on command 'Disable-WindowsErrorReporting'***

***PS C:\Users\wahid> Get-Help Disable-WindowsErrorReporting***

#### NAME

Disable-WindowsErrorReporting

#### SYNOPSIS

Disables Windows Error Reporting.

#### SYNTAX

Disable-WindowsErrorReporting [<CommonParameters>]

#### DESCRIPTION

The Disable-WindowsErrorReporting cmdlet disables Windows Error Reporting (WER) on the server.

Windows Error Reporting is a flexible feedback infrastructure that gathers information about hardware and software problems, reports the information to Microsoft, and gives users any available solutions. Windows Error Reporting generates reports in response to system events, such as application crashes or kernel faults.

To get the current WER status, use the `Get-WindowsErrorReporting` (`./Get-WindowsErrorReporting.md`)cmdlet. If you disable WER, you can use the `Enable-WindowsErrorReporting` (`./Enable-WindowsErrorReporting.md`)cmdlet to re-enable it. After you run this cmdlet, WER again sends information about application failures to Microsoft. To customize the settings of Windows Error Reporting, use registry keys described in the [WER Settings \(/windows/desktop/wer/wer-settings\)](/windows/desktop/wer/wer-settings)article.

## PARAMETERS

### <CommonParameters>

This cmdlet supports the common parameters: `Verbose`, `Debug`, `ErrorAction`, `ErrorVariable`, `WarningAction`, `WarningVariable`, `OutBuffer`, `PipelineVariable`, and `OutVariable`. For more information, see [about\\_CommonParameters \(https://go.microsoft.com/fwlink/?LinkID=113216\)](https://go.microsoft.com/fwlink/?LinkID=113216).

----- Example 1: Disable Windows Error Reporting -----

```
PS C:\> Disable-WindowsErrorReporting
```

This command disables Windows Error Reporting.

## REMARKS

To see the examples, type: `"get-help Disable-WindowsErrorReporting -examples"`.

For more information, type: `"get-help Disable-WindowsErrorReporting -detailed"`.

For technical information, type: `"get-help Disable-WindowsErrorReporting -full"`.

For online help, type: `"get-help Disable-WindowsErrorReporting -online"`
