PowerShell Get-Help on command 'Export-StartLayoutEdgeAssets'

PS C:\Users\wahid> Get-Help Export-StartLayoutEdgeAssets

NAME

Export-StartLayoutEdgeAssets

SYNOPSIS

Exports secondary tiles for Microsoft Edge that display a custom image.

SYNTAX

Export-StartLayoutEdgeAssets -LiteralPath <String> [-Confirm] [-WhatIf]

[<CommonParameters>]

Export-StartLayoutEdgeAssets [-Path] <String> [-Confirm] [-WhatIf]

[<CommonParameters>]

DESCRIPTION

The Export-StartLayoutEdgeAssets cmdlet exports secondary tiles for Microsoft

Edge that display a custom image. Use Export-StartLayout

(./Export-StartLayout.md) and

[Import-StartLayout](./Import-StartLayout.md)along with the current cmdlet to

import the assets. For more information, see Add image for secondary Microsoft

Edge tiles (/windows/configuration/start-secondary-tiles).

The provisioning policies that use the exported assets are no longer used with
the Windows 11 Start menu.

PARAMETERS

  -LiteralPath <String>

    Specifies a literal path for an asset file. Include the `.xml` file name

    extension. This parameter does not accept the wildcard character (*). If

    the path includes an escape character (\), enclose the string in single

    quotes (').

  -Path <String>

    Specifies an absolute path for an asset file. Include the `.xml` file name

    extension. This parameter does not accept the wildcard character (*).

  -Confirm [<SwitchParameter>]

    Prompts you for confirmation before running the cmdlet.

  -WhatIf [<SwitchParameter>]

    Shows what would happen if the cmdlet runs. The cmdlet is not run.

  <CommonParameters>

    This cmdlet supports the common parameters: Verbose, Debug,

    ErrorAction, ErrorVariable, WarningAction, WarningVariable,

    OutBuffer, PipelineVariable, and OutVariable. For more information, see

    about_CommonParameters (https:/go.microsoft.com/fwlink/?LinkID=113216).

------------------- Example 1: Export assets -------------------

Export-StartLayoutEdgeAssets -Path "C:\Layouts\assets.xml"

This example exports the assets to the file `assets.xml` in the `C:\Layouts` folder. This cmdlet doesn't append `.xml` to a file name.

REMARKS

To see the examples, type: "get-help Export-StartLayoutEdgeAssets -examples".

For more information, type: "get-help Export-StartLayoutEdgeAssets -detailed".

For technical information, type: "get-help Export-StartLayoutEdgeAssets -full".

For online help, type: "get-help Export-StartLayoutEdgeAssets -online"
