PowerShell Get-Help on command 'Get-NetDnsTransitionMonitoring'

PS C:\Users\wahid> Get-Help Get-NetDnsTransitionMonitoring

NAME

Get-NetDnsTransitionMonitoring

SYNOPSIS

Retrieves the DNS64 configuration of a computer.

SYNTAX

```
Get-NetDnsTransitionMonitoring [-AsJob] [-CimSession <CimSession[]>]
[-ThrottleLimit <Int32>] [<CommonParameters>]
```

DESCRIPTION

The Get-NetDnsTransitionMonitoring cmdlet retrieves operational statistics for the DNS64, including the number of successful queries and number of failed queries.

PARAMETERS

-AsJob [<SwitchParameter>]

Runs the cmdlet as a background job. Use this parameter to run commands

that take a long time to complete.

`-CimSession <CimSession[]>`

Runs the cmdlet in a remote session or on a remote computer. Enter a computer name or a session object, such as the output of a `New-CimSession` (<https://go.microsoft.com/fwlink/p/?LinkId=227967>) or `[Get-CimSession](https://go.microsoft.com/fwlink/p/?LinkId=227966)` cmdlet. The default is the current session on the local computer.

`-ThrottleLimit <Int32>`

Specifies the maximum number of concurrent operations that can be established to run the cmdlet. If this parameter is omitted or a value of ``0`` is entered, then Windows PowerShell calculates an optimum throttle limit for the cmdlet based on the number of CIM cmdlets that are running on the computer. The throttle limit applies only to the current cmdlet, not to the session or to the computer.

`<CommonParameters>`

This cmdlet supports the common parameters: `Verbose`, `Debug`, `ErrorAction`, `ErrorVariable`, `WarningAction`, `WarningVariable`, `OutBuffer`, `PipelineVariable`, and `OutVariable`. For more information, see `about_CommonParameters` (<https://go.microsoft.com/fwlink/?LinkID=113216>).

----- Example 1: Get the DNS64 configuration -----

```
PS C:\>Get-NetDnsTransitionMonitoring
```

This command retrieves the DNS64 monitoring information.

REMARKS

To see the examples, type: `"get-help Get-NetDnsTransitionMonitoring -examples"`.

For more information, type: `"get-help Get-NetDnsTransitionMonitoring -detailed"`.

For technical information, type: `"get-help Get-NetDnsTransitionMonitoring`

-full".

For online help, type: "get-help Get-NetDnsTransitionMonitoring -online"
