PowerShell Get-Help on command 'Get-PrinterPort'

PS C:\Users\wahid> Get-Help Get-PrinterPort

NAME

  Get-PrinterPort

SYNOPSIS

  Retrieves a list of printer ports installed on the specified computer.

SYNTAX

  Get-PrinterPort [[-Name] <String[]>] [-AsJob] [-CimSession <CimSession[]>]

  [-ComputerName <String>] [-ThrottleLimit <Int32>] [<CommonParameters>]

DESCRIPTION

  The Get-PrinterPort cmdlet retrieves a list of printer ports that are

  installed on the specified computer.

  You can use wildcard characters with Get-PrinterPort . You can use

  Get-PrinterPort in a Windows PowerShell remoting session.

  You do not need administrator credentials to run Get-PrinterPort .

PARAMETERS

   -AsJob [<SwitchParameter>]

      Runs the cmdlet as a background job. Use this parameter to run commands

      that take a long time to complete.

   -CimSession <CimSession[]>

      Runs the cmdlet in a remote session or on a remote computer. Enter a

      computer name or a session object, such as the output of a New-CimSession

      (https://go.microsoft.com/fwlink/p/?LinkId=227967) or

      [Get-CimSession](https://go.microsoft.com/fwlink/p/?LinkId=227966)cmdlet.

      The default is the current session on the local computer.

   -ComputerName <String>

      Specifies the name of the computer from which to retrieve the list of

      printer ports.

   -Name <String[]>

      Specifies the name of the printer port about which to retrieve

      information. You can use wildcard characters to specify the printer port

      name.

   -ThrottleLimit <Int32>

      Specifies the maximum number of concurrent operations that can be

      established to run the cmdlet. If this parameter is omitted or a value of

      `0` is entered, then Windows PowerShellr calculates an optimum throttle

      limit for the cmdlet based on the number of CIM cmdlets that are running

      on the computer. The throttle limit applies only to the current cmdlet,

      not to the session or to the computer.

   <CommonParameters>

      This cmdlet supports the common parameters: Verbose, Debug,

      ErrorAction, ErrorVariable, WarningAction, WarningVariable,   *Page 2/3*

OutBuffer, PipelineVariable, and OutVariable. For more information, see

about_CommonParameters (https:/go.microsoft.com/fwlink/?LinkID=113216).

------------ Example 1: Get a list of printer ports ------------

Get-PrinterPort

This command retrieves a list of all the printer ports installed on the local

computer.
