PowerShell Get-Help on command 'Remove-Event'

PS C:\Users\wahid> Get-Help Remove-Event

NAME

   Remove-Event

SYNOPSIS

   Deletes events from the event queue.

SYNTAX

   Remove-Event [-EventIdentifier] <System.Int32> [-Confirm] [-WhatIf]

   [<CommonParameters>]

   Remove-Event [-SourceIdentifier] <System.String> [-Confirm] [-WhatIf]

   [<CommonParameters>]

DESCRIPTION

   The `Remove-Event` cmdlet deletes events from the event queue in the current

   session.

   This cmdlet deletes only the events currently in the queue. To cancel event

   registrations or unsubscribe, use the `Unregister-Event` cmdlet.

PARAMETERS

   -EventIdentifier <System.Int32>

     Specifies the event identifier for which the cmdlet deletes. An

     EventIdentifier or SourceIdentifier parameter is required in every command.

   -SourceIdentifier <System.String>

     Specifies the source identifier for which this cmdlet deletes events from.

     Wildcards are not permitted. An EventIdentifier or SourceIdentifier

     parameter is required in every command.

   -Confirm <System.Management.Automation.SwitchParameter>

     Prompts you for confirmation before running the cmdlet.

   -WhatIf <System.Management.Automation.SwitchParameter>

     Shows what would happen if the cmdlet runs. The cmdlet is not run.

   <CommonParameters>

     This cmdlet supports the common parameters: Verbose, Debug,

     ErrorAction, ErrorVariable, WarningAction, WarningVariable,

     OutBuffer, PipelineVariable, and OutVariable. For more information, see

     about_CommonParameters (https:/go.microsoft.com/fwlink/?LinkID=113216).

------- Example 1: Remove an event by source identifier -------

PS C:\> Remove-Event -SourceIdentifier "ProcessStarted"

This command deletes events with a source identifier of Process Started from

the event queue.

-------- Example 2: Remove an event by event identifier --------

PS C:\> Remove-Event -EventIdentifier 30

This command deletes the event with an event ID of 30 from the event queue.

----------------- Example 3: Remove all events -----------------

PS C:\> Get-Event | Remove-Event

This command deletes all events from the event queue.

REMARKS

To see the examples, type: "get-help Remove-Event -examples".

For more information, type: "get-help Remove-Event -detailed".

For technical information, type: "get-help Remove-Event -full".
