PowerShell Get-Help on command 'Remove-NetSwitchTeamMember'

PS C:\Users\wahid> Get-Help Remove-NetSwitchTeamMember

NAME

Remove-NetSwitchTeamMember

SYNOPSIS

Removes a network adapter member from a switch team.

SYNTAX

```
Remove-NetSwitchTeamMember [-Name] <String> [-Team] <String> [-AsJob]
[-CimSession <CimSession[]>] [-ThrottleLimit <Int32>] [<CommonParameters>]
```

DESCRIPTION

The Remove-NetSwitchTeamMember cmdlet removes a network adapter team member from the specified switch team. The specified switch team must be an existing switch team. The member designated must exist in the specified switch team.

PARAMETERS

-AsJob [<SwitchParameter>]

Runs the cmdlet as a background job. Use this parameter to run commands

that take a long time to complete.

-CimSession <CimSession[]>

Runs the cmdlet in a remote session or on a remote computer. Enter a computer name or a session object, such as the output of a `New-CimSession` (<https://go.microsoft.com/fwlink/p/?LinkId=227967>) or `[Get-CimSession](https://go.microsoft.com/fwlink/p/?LinkId=227966)` cmdlet. The default is the current session on the local computer.

-Name <String>

Specifies the name of the switch team member or an object that represents a part of a switch team. The adapter names are the `IfAlias` names, such as `Ethernet 2`.

-Team <String>

Specifies the name of switch team from which to remove the network adapter. The switch team must already exist and must be a switch team.

-ThrottleLimit <Int32>

Specifies the maximum number of concurrent operations that can be established to run the cmdlet. If this parameter is omitted or a value of ``0`` is entered, then Windows PowerShell calculates an optimum throttle limit for the cmdlet based on the number of CIM cmdlets that are running on the computer. The throttle limit applies only to the current cmdlet, not to the session or to the computer.

<CommonParameters>

This cmdlet supports the common parameters: `Verbose`, `Debug`, `ErrorAction`, `ErrorVariable`, `WarningAction`, `WarningVariable`, `OutBuffer`, `PipelineVariable`, and `OutVariable`. For more information, see `about_CommonParameters` (<https://go.microsoft.com/fwlink/?LinkID=113216>).

```
PS C:\>Remove-NetSwitchTeamMember -Team "SwitchTeam01" -Member "Ethernet 2"
```

This command removes the network adapter named Ethernet 2 from the switch team named SwitchTeam01.
